Summary

Experienced Java Fullstack Developer with 1.5+ years of expertise in backend development using Java, Spring Boot, and Microservices, as well as frontend development with Spring MVC and Angular. Skilled in creating and optimizing RESTful APIs to improve data exchange and client satisfaction. Enhanced system performance with Hibernate using MySQL and PostgreSQL. Proficient in Postman Rest API testing and actively involved in Agile methodologies. Strong foundation in AWS and Angular.

Technical Skills

Core Java | Java 8+ | Spring Boot | Spring Core | Spring MVC | Microservices | Restful Webservices | Hibernate | Spring Data JPA | SQL | Angular | MySQL | PostgreSQL | Kafka | AWS (EC2, S3, RDS) | Jenkins | GitHub Actions | CI/CD | Git | Maven | Gradle | JUnit5 | Mockito | Postman | Swagger | TypeScript | HTML5 | CSS3 | SonarQube | AI-Assisted Development | GitHub Copilot | API Integration

Professional Experience

Intent Software Solutions

Jan 2025 – Present

Software Developer

Pune, Maharashtra

- Developed and maintained backend services using Java 21, Spring Boot 3.4, Hibernate 6.6, and Spring Data JPA for enterprise applications.
- Designed and implemented RESTful APIs to support business workflows, system integrations, and multi-stage approval processes.
- Worked with PostgreSQL 16 for database design, query optimization, schema management, and efficient CRUD operations.
- Implemented validation, exception handling, and business logic to ensure application reliability and data integrity.
- Documented REST APIs using Swagger/OpenAPI to support integration and testing activities.
- Wrote and executed unit tests using JUnit 5 and Mockito to improve code quality and maintainability.
- Performed API testing and debugging using Postman and resolved defects identified during development and testing.
- Contributed to feature development, bug fixes, and application enhancements in an Agile Scrum environment.

Projects

FinLogic

- Built backend services for loan onboarding, approval workflows, disbursement, repayment scheduling, and contract lifecycle management.
- Designed REST APIs for customer operations, loan validation, and multi-stage approval workflow management.
- Implemented business logic and transactional operations ensuring ACID compliance and data consistency.
- Added validation and exception handling to improve API reliability and documented all APIs using Swagger.
- Performed end-to-end API testing using Postman ensuring seamless integration across all loan management modules.

SupplySphere

- Developed backend services for inventory tracking, stock allocation, warehouse transfers, and order management.
- Built RESTful APIs for goods receiving, bin allocation, picking, packing, dispatch, and automated stock updates.
- Implemented transactional flows ensuring inventory accuracy and designed exception handling layers across all APIs.
- Wrote unit tests using JUnit 5 and Mockito and performed end-to-end API testing using Postman.
- Reduced manual intervention in stock update processes by implementing automated inventory reconciliation workflows.

Education

N. K. Orchid College of Engineering & Technology

B.Tech in Computer Science & Engineering
